PROFESSIONAL SUMMARY

Electronics and Computer Science undergraduate at the University of Kelaniya with hands-on experience building full-stack web applications across multiple stacks (MERN, Java/Spring Boot, PHP). Comfortable across the full development lifecycle from responsive UI to REST API design, database architecture, and deployment. Seeking a Software Engineering internship to apply strong problem-solving and development skills in a fast-paced team environment.

EDUCATION

BSc (Hons) in Electronics and Computer Science

University of Kelaniya

Expected 2027

Current GPA:3.4/4.0

PROJECT EXPERIENCE

AutoHive – Vehicle Spare Parts Management System (In Development)

Java, Spring Boot, MySQL, Next.js, Tailwind CSS, Postman | [GitHub](#)

- Designed a three-role platform architecture (Customer, Seller, Admin) using Spring Boot and Next.js, enabling customers to post product inquiries and sellers to submit competitive quotations.
- Built RESTful APIs to manage inquiry lifecycles (posted → quoted → accepted) and seller quotation submissions, with MySQL for relational data integrity across users, inquiries, and quotes.
- Implementing a matching/notification system to alert relevant sellers of new customer inquiries in real time.

AI Powered Invoice Generator

React, Vite, Node.js, Express, MongoDB, Tailwind CSS, Google AI Studio (Gemini API) | [GitHub](#)

- Developed a full-stack invoice management application (MERN) allowing freelancers and small businesses to create, manage, and export professional invoices with their own branding and business details.
- Integrated Google AI Studio (Gemini API) to enable AI prompt-based invoice generation, letting users generate a complete invoice from a natural-language description instead of manual form entry.
- Implemented secure user data storage in MongoDB, so each freelancer's business details persist across sessions for fast, repeatable invoice generation.

Café Management System

C#, .NET 8, Windows Forms, SQL Server, RDLC Reporting | [Documentation](#)

- Built a modular Windows Forms desktop application in C# and .NET 8 for café order processing, menu, and employee management, as part of a 4-member team.
- Designed a relational database schema (Items, Employees, Users) with role-based authentication (Admin/Staff) and a live dashboard summarizing daily sales and inventory.
- Generated exportable sales and stock reports (PDF) using RDLC, with input validation and error handling throughout.

Taxi Meeya – Modern Taxi Booking System

PHP, MySQL, JavaScript, HTML/CSS | [GitHub](#)

- Built a complete taxi booking platform with a responsive frontend, PHP backend, and admin dashboard for managing bookings and drivers.
- Implemented real-time booking management logic with MySQL for persistent trip, user, and driver data.

Blushify Online Store

React, Vite, Bootstrap | [Live Demo](#) | [GitHub](#)

- Developed a responsive e-commerce platform for skincare/beauty products with product carousels and category-based browsing.
- Implemented seamless client-side routing using React Router for smooth navigation across product and check-out pages.

CERTIFICATES

- AWS Educate Introduction to Cloud 101 – Amazon Web Services (AWS) (Sep 2025)
- DevOps Prerequisite Course – KodeKloud (Dec 2025)
- Programming Foundations with JavaScript, HTML and CSS – Duke University (June 2024)
- Python for Beginners - Dept. of CS&E, University of Moratuwa (2025)

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C, C#, PHP, SQL, HTML, CSS
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, Vite, Framer Motion, GSAP
- **Backend & APIs:** Node.js, Express.js, Spring Boot, Flask, REST APIs, JWT, .NET, Microservices
- **Databases:** MySQL, MongoDB, PostgreSQL, MS SQL Server
- **DevOps & Cloud:** Git, GitHub, Linux, Docker, AWS, Azure, DigitalOcean
- **AI & Machine Learning:** PyTorch, Scikit-learn, Pandas, NumPy, Hugging Face, RAG Pipelines

LEADERSHIP & VOLUNTEERING

Head of Design

Electronics & Computer Science Club, UoK

May 2024 - Apr 2025

- Led the design team of the Electronics and Computer Science Club.
- Collaborated with the EXCO to deliver promotional materials on schedule.
