PROFESSIONAL SUMMARY

Electronics & Computer Science undergraduate (Kelaniya) who ships full-stack products end-to-end — from AI-integrated web apps to freelance client projects built on Next.js and Spring Boot. Comfortable owning a feature from database schema to polished UI.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, Java, C, C#, PHP, SQL, HTML, CSS
- **Frontend:** React.js, Next.js, Tailwind CSS, Bootstrap, Vite, Framer Motion, GSAP
- **Backend & APIs:** Node.js, Express.js, Spring Boot, Flask, REST APIs, JWT, .NET, Microservices
- **Databases:** MySQL, MongoDB, PostgreSQL, MS SQL Server
- **DevOps & Cloud:** Git, GitHub, Linux, Docker, AWS, Azure, DigitalOcean
- **AI & Machine Learning:** PyTorch, Scikit-learn, Pandas, NumPy, Hugging Face, Prompt Engineering
- **Dev Tools:** VS Code, IntelliJ IDEA, Postman
- **Design Tools:** Figma, Adobe XD, Photoshop, Illustrator

EDUCATION

BSc (Hons) in Electronics and Computer Science

University of Kelaniya

July 2023 - Present

- Current GPA: 3.4 / 4.0

WORK EXPERIENCE

Freelance Full-Stack Developer

Fiverr & Freelancer.com

- Delivered 4+ client web apps (Next.js, Node.js, MongoDB) from requirements to deployment, including a taxi booking platform with real-time admin dashboard.

RESEARCH EXPERIENCE

Automatic Detection and Replacement of Offensive Sinhala Language in Text

Deep Learning & Natural Language Processing

- Fine-tuned an XLM-RoBERTa transformer on the SOLD dataset (10,000 annotated Sinhala tweets), achieving 82% accuracy / 0.82 F1-score on 2,500 held-out samples, and published the model on Hugging Face for public evaluation.
- Currently extending the system into a full text-detoxification pipeline, designing an mT5-base + LoRA generative module to neutralize offensive language while preserving semantic meaning.

PROJECTS

AutoHive – Vehicle Spare Parts Inventory System (in progress)

- Building a full-stack inventory & sales management platform for vehicle spare parts businesses, featuring role-based dashboards for admin, seller, and customer roles with differentiated access control. Backend architected with Spring Boot + MySQL; frontend built with Next.js + Tailwind CSS.

AI-Powered Invoice Generator

- Built an AI-driven invoice management app enabling unlimited line-item entries and one-prompt AI invoice generation via Gemini API, plus an AI-insights dashboard summarizing invoice/spending trends. Full-stack with React, Node.js, Express, and MongoDB.

Personal Developer Portfolio

- Designed and developed an interactive personal portfolio integrating the Spotify API to display real-time listening activity, with custom animated UI components (React, Next.js, Tailwind CSS, Framer Motion).

Taxi Meeya – Modern Taxi Booking System

- Built a full-stack taxi booking platform with an admin dashboard for managing bookings, drivers, and live booking status updates. (PHP, MySQL, JavaScript, HTML, CSS)

CERTIFICATES

- Programming Foundations with JavaScript, HTML and CSS – Duke University (June 2024)
- Python for Beginners – University of Moratuwa (Aug 2025)
- AWS Educate Introduction to Cloud 101 – Amazon Web Services (AWS) (Sep 2025)
- DevOps Prerequisite Course – KodeKloud (Dec 2025)

ADDITIONAL INFORMATION

Spoken Languages: English, Sinhala.

Leadership & Volunteering:

- Head of Design & Graphic Designer - Electronics & Computer Science Club, UoK
- Graphic Designer - VidE, University of Kelaniya
- Creative Designer - Sri Lanka Rugby
- Freelance Graphic Designer - Lions Club Ederamulla

Content Creation

- Authored the "DEV TIPS" technical series on LinkedIn covering software engineering best practices, semantic versioning, and Git/GitHub workflows.
